Profile

Aspiring computer science professional with a strong foundation in programming, problem-solving, and software development. Seeking an internship or entry-level position to apply technical skills and contribute to innovative projects while continuing to grow as a computer scientist.

Professional Experience

September 2023 – present

NUCERY Team Leader

French Brand

Lead and coordinate a multidisciplinary team to optimize NUCERY brand, enhance customer service, and drive sales growth. Oversaw staff training, workflow management, and quality control to ensure a seamless customer experience and maintain high operational standards.

2022 – present

Quran Teacher

Teaching Assistant

Skilled educator specializing in teaching the Quran, including its recitation, and memorization. Guide students in mastering Tajweed (proper pronunciation) and developing a deep connection with the Quranic teachings. Adapt my methods to suit learners of various ages and levels.

Education

October 2022 – present
Cairo, Egypt

Computer Science Junior

Ain Shams University 

- *Data Structures & Algorithms, Operating Systems, Object Oriented Programming, Databases, Computer Networks, Artificial Intelligence, Computer Architecture, System Analysis & Design, Business Intelligence, Web Development, Data Security, High Performance Computing.*

Projects

April 2025 – May 2025

Image Segmentation

C#

Implemented graph-based image segmentation using intensity and region comparison strategies to partition images into meaningful regions with Algorithms concept.

April 2024 – May 2024

Spam Email Classifier

AI

Build a machine learning model to classify emails as spam or ham, achieving high accuracy 95%

April 2024 – May 2024

Word Frequency Count

Data Structures

Developed by C++ with GUI to count word frequencies with Data Structures concept.

2022 **Wave power Project** [↗](#)
Communication between Technology and Alternative Energy
Harnesses buoys to harness wave energy to produce 7.56 watts with an efficiency of 72.28%, outperforming earlier methods by 2.28%. Developed by Python.

April 2025 – May 2025 **Fiona Patisserie – Bakery Web Application** [↗](#)
Node.js
Full-stack bakery e-commerce app with React frontend and Express/MongoDB backend, enabling product management, user authentication, order processing, and feedback.
